**Professore:** Lei ha una qualche ambizione?

**Nicola:** Ma... Non...

**Professore:** E Allora vada via... Se ne vada dall'Italia. Lasci l'Italia finché è in tempo.  
Cosa vuole fare, il chirurgo?

**Nicola:** Non lo so, non ho ancora deciso...

**Professore:** Qualsiasi cosa decida, vada a studiare a Londra, a Parigi... Vada in America, se ha le possibilità, ma lasci questo Paese. L'Italia è un Paese da distruggere: un posto bello e inutile, destinato a morire.

**Nicola:** Cioè, secondo lei tra poco ci sarà un'apocalisse?

**Professore:** E magari ci fosse, almeno saremmo tutti costretti a ricostruire... Invece qui rimane tutto immobile, uguale, in mano ai dinosauri. Dia retta, vada via...

# The ATLAS experiment

---

# Going beyond the Standard Model

---

The Standard Model (SM) of particle physics is the most successful, beautiful and precise theory describing the interactions between fundamental particles. Its validity has been tested by precision measurements at the Large Electron-Positron Collider (LEP) at CERN and confirmed by the observation of all the particles it predicts, including the Higgs-like boson discovered at the Large Hadron Collider (LHC) in July of 2012 which up to now behaves as expected from the SM.

What makes the SM “only” an effective theory is the fact that instabilities appear at high energy scales of the order of the Planck mass. In this Chapter we will show

## 2.1 Building the Standard Model

## 2.2 New Physics Models predicting vector-like quarks

[1, 2]

# Objects reconstruction

---

## 3.1 Electrons

## 3.2 Muons

## 3.3 Jets

## 3.4 Missing Transverse Energy

# Monte Carlo simulation

---

73

74

## 4.1 Parton shower

75

## 4.2 Hadronization

76

## 4.3 Underlying-event

77

## 4.4 Generators

78

# Search for vector-like top partners pairs decaying to $Wb + X$

---

## 5.1 Data sample

## 5.2 Monte Carlo simulated samples

### 5.2.1 SM processes

### 5.2.2 Signal samples

## 5.3 Multi-jet background

## 5.4 Object definition

### 5.4.1 Boosted $W$ reconstruction

## 5.5 Control regions

## 5.6 Event selection

## 5.7

## 5.8

## 5.9

# Statistical treatment and Results

---

98 **6.1 The  $\text{CL}_s$  method**

99 **6.2 Systematics**

100 **6.3 Results**

101

# Conclusions

102

---

108 **Search for  $T\bar{T} \rightarrow Wb+X$  at  $\sqrt{7}$  TeV**

109 

---

111 Preliminary search for  $T\bar{T} \rightarrow Ht +$   
112  $X$   
113

---
